

YAZIKÖY PRIMARY SCHOOL

E-Security Policy and Aims

1. We believe that e-security is an indispensable element for protecting children and adults in a digital world while using technological devices.

2. We believe that virtual platforms and information communication technologies have an important place in our daily lives. Therefore, supporting activities are applied to manage the risks the students confront on the web.

3. Our school has the responsibility to advance education standards, foster success, support the professional well-being of the staff, improve administrative functions, and provide a high quality internet connection.

4. Our school is in charge of protecting our students and staff from potential hazards of virtual platforms.

5. The aims of our e-security policy:

- Our school defines the main principles of using secure and reliable technology embraced by society.

- To protect each member of our school community online.

- To raise awareness of potential risks and benefits of technology.

- To ensure staff members to work responsibly and modeling positive behaviours online

- To eliminate the hesitations of community members about online security.

- This policy is valid for the use of communication devices including personal devices and internet connection. Furthermore this policy extends to mobile devices, tablets and laptops provided by the school for the students and staff.
